PROFESSIONAL SUMMARY

Software Engineering undergraduate at PUC Minas, expected to graduate in July 2028, with hands-on experience building full-stack applications for real clients. Works with Java, Spring Boot, React, REST APIs, relational databases, business rules, JWT authentication, secure password storage, layered architecture, and AWS deployment. Currently a Data Analytics Intern at Stellantis, developing dashboards and data products for the Connected Services, TechOps, and Projects team. Experienced with Git, GitHub, pull requests, code review, Scrum, Kanban, and cross-functional collaboration.

TECHNICAL SKILLS

Backend Development: Java, Spring Boot, RESTful APIs, Python, C

Frontend Development: React, Next.js, Tailwind CSS, Angular, JavaScript

Cloud and Tools: AWS, Docker, RabbitMQ, Git, GitHub, GitHub Projects, Postman, Figma

Data and Business Intelligence: Data analysis, Microsoft Power BI, Microsoft Excel, Power Automate, DAX

Engineering Practices: OOP, design patterns, Clean Code, SOLID principles, microservices, Scrum, Kanban, Agile methodologies

PROFESSIONAL EXPERIENCE

Data Analytics Intern

Jun 2025 - Present

Stellantis South America

- Develop and maintain 10 Business Intelligence dashboards for the Connected Services, TechOps, and Projects team, turning operational data into actionable information for monitoring and decision-making.
- Monitor TechOps initiatives, backlogs, and sprints. Centralized sprint and project data in a single report, cutting manual tracking time from hours to minutes.
- Support project lifecycle management through daily updates and weekly reviews, enabling cross-functional alignment and timely execution.

Volunteer Project Manager

Jun 2026 - Present

PUC Minas Experimental Software Agency | APAC Feminina de Belo Horizonte

- Lead a team of 9 developers building a pro bono pharmacy management system for APAC Feminina de Belo Horizonte using Java, Spring Boot, Next.js, and PostgreSQL.
- Contribute to technical decisions, assign tasks, track deliverables, review pull requests, and lead alignment on requirements and priorities with the team and client.

Remote Technical Support Intern

Feb 2024 - May 2025

Konica Minolta Healthcare do Brasil

- Managed and maintained client and support data in the CRM platform, improving record accuracy and organization.
- Logged, routed, and monitored remote support tickets, acting as a liaison between clients and the technical team to support timely issue resolution and continuous service improvement.

EDUCATION

Bachelor of Science in Software Engineering

Aug 2024 - Expected Jul 2028

PUC Minas

Integrated High School and Technical Diploma in Biomedical Equipment

Jan 2021 - Jan 2023

Federal Center for Technological Education of Minas Gerais - CEFET-MG

RELEVANT PROJECTS

PSI+

Full-Stack Developer

- Collaborated on a web platform for psychological appointment management using Java, Spring Boot, and Azure SQL Server.
- Designed REST APIs and business rules following a layered architecture, with separation of concerns and maintainable code.
- Contributed to development and version control using Git, GitHub Projects, and Agile practices.
- Developed web interface features with React.

REALConsult

Full-Stack Developer

- Collaborated on a management and auditing system for VT Real, a company specializing in employee transportation benefit management.
- Built features for audit monitoring and tracking, client management, and financial analysis.
- Implemented the backend with Java, Spring Boot, and MySQL, connecting business rules to the platform's operational and analytical capabilities.
- Implemented JWT authentication and secure password storage with Bcrypt.
- Delivered a solution used by the client in a real business environment.
- Won the Best Interdisciplinary Project award at PUC Minas' We Make Software competition.

CERTIFICATIONS AND COURSES

AWS Cloud Foundations - Amazon Web Services (AWS)

Clean Code - Rocketseat

Algorithms and Object-Oriented Programming Fundamentals with Swift - Eldorado Research Institute

Red Hat System Administration I (RH124 - RHA), Version 9.3 - Red Hat
